

- PC application
- Supports the work of operators and dispatchers
- Monitoring and visualization of devices

V-Cast Console is an application that works with the V-Cast system. It significantly simplifies and speeds up work in the positions of system operators. It makes it easy for dispatchers and operators:

- make and receive calls
- broadcast messages to defined groups of devices (zones)
- broadcast messages to dynamically created groups of devices (zones)
- broadcast live announcements
- broadcast pre-recorded information and alarm messages
- create conference rooms
- broadcast music
- monitor the status of devices registered in the system on an ongoing basis

V-Cast Console has also been designed to support touch screens. The application will be perfect for public address systems and communication in public facilities, schools, public safety and smart city applications, and facility protection.
