

VCRS1000

V-Cast Recording Server

- Voice recorder for V-Cast system
- Low power consumption up to 12W
- Can be installed in RACK 19 "

V-Cast Recording Server is an IP-based call recorder. It enables recording of conversations in the V-Cast communication system. The software is flexible in configuration and requires a license depending on the number of registered subscribers. The system enables recording of internal and external calls through available trunks. Access to the stored recordings is possible through the implemented web server.
